DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bresolin (US5518611) in view of Rauglas (US2866294).
- 3. Regarding claim 1, Bresolin discloses a bait tank (col 1, line 59), and first and second interior wall compartments 2, 6 separated from one another and the wall, and a dual compartment filtration unit 1 removably accommodated within the interior portion of the second compartment 16, filtration unit inflow and outflow water conduits 7, 8; each of said conduits 7, 8 communicably attaching the filtration unit 1 to the first and second interior compartments; and pump means 12 for circulating water through the first and second compartments.
- 4. Bresolin does not disclose that the tank is oval shaped.
- 5. Rauglas discloses an oval shaped tank 10, 11.
- 6. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of Rauglas to the invention of Bresolin in order to make the bait tank easier to clean.
- 7. Regarding claim 2, Bresolin discloses a water conditioning unit 9 attached to the bait tank via input and output water conditioning conduits 7, 8.

Application/Control Number: 10/650,158 Page 3

Art Unit: 3643

8. Regarding claim 3, Bresolin discloses one or more tubular rod holders 21, 22 affixed to the tank's exterior wall.

- 9. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bresolin in view of Rauglas as applied to claim1- above, and further in view of Lovits (US 3635344).
- 10. Regarding claim 6, Bresolin as modified by Rauglas does not disclose a control means for setting upper and lower reference temperatures.
- 11. Lovitz discloses a control means for temperature 23.
- 12. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of Lovitz to the invention of Bresolin as modified by Rauglas in order to keep the bait within tolerable living temperatures within the environment of the bait tank. It would have further been obvious to one of ordinary skill in the art at the time the invention was made to include a control means for temperature in order to keep the bait alive. It is notoriously old and well known in the art to control the temperature range of bait being held in a bait tank, even if only by placing a container in the shade on a hot day.

Allowable Subject Matter

13. Claims 7-10 are allowed.

Art Unit: 3643

14. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haldeman US2137397; Huska US6659043; Gunther US546883; Korez US5171438; Hsu et al.
